

THE SOL GREENHOUSE 240

The Sol Greenhouse 240 is our largest standard greenhouse footprint and is ideal for residential purposes, acreages or community gardens. The Sol 240 is a unique combination of greenhouse space and an attached vestibule that can be used for grid-tied off-season growing or as a convenient, secure storage and potting shed. The Sol Greenhouse 240 has 144 square feet of growing space and a 96 square foot vestibule, which is perfect for a small studio. The Sol 240 has an optional solar-powered ductless heating and cooling pump to extend the growing season and minimizing heat during hot summer months.
